

## Suite Itastat 6

### Itaconv 6

- Conversione dati da CMM, rotondimetri, rugosimetri, ecc...
- Funzionamento automatico
- Gestione dati ausiliari
- Gestione barcone / datamatrix ...

### Itastat 6 Misura

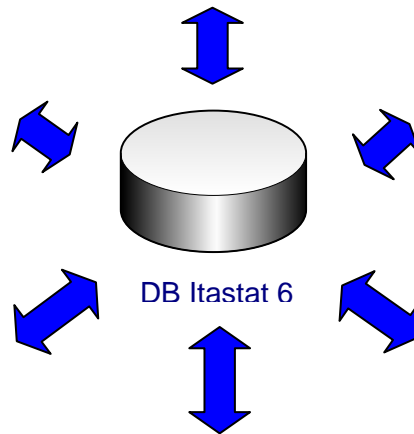

- Carte di controllo in tempo reale
- Collegamento strumentazione manuale, calibri, tamponi, sonde, calibri multiquota e controlli post-process al 100%
- Interfaccia configurabile
- Gestione disegni e documenti

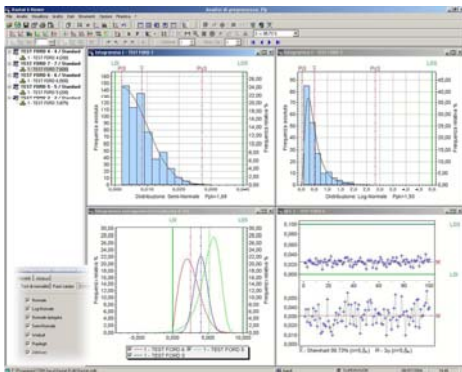

### Itageo 6 Itasonic calibri speciali

- Controllo dischi e tamburi freno
- Controllo alberi e motori elettrici
- Calibri speciali
- Banche controllo difetti
- Controllo frequenze di Eigen

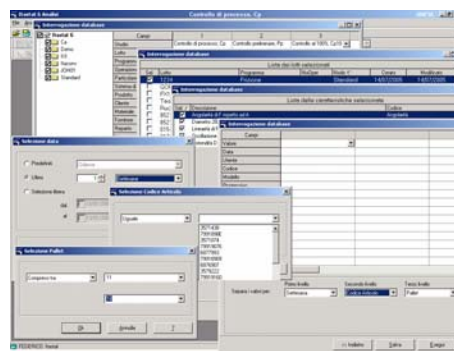

### Itastat 6 Analisi

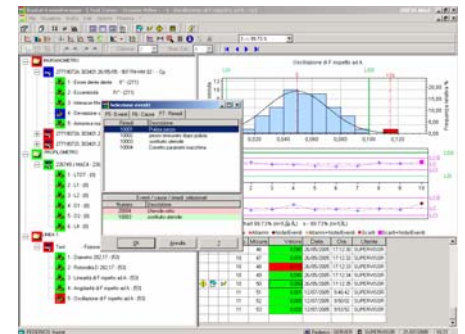

- Analisi SPC (Cm, Cp, 100%)
- Analisi capacità strumenti di misurazione MSA
- Completa rispondenza ai test Ford
- Salvataggio valutazione statistica

### Itaselect

- Autocomposizione query
- Memorizzazione query
- Stratificazione dati x report (Cp per macchina e per settimana / mese)

### Italarm

- Monitoraggio in tempo reale delle caratteristiche critiche
- Architettura client-server
- Remotazione misure e allarmi

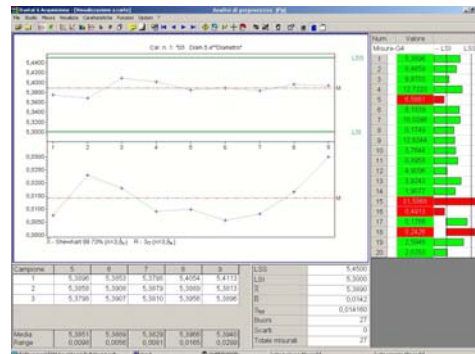

## Itastat 6 Suite

### Itaconv 6

- Data conversion from CMMs, surface roughness/roundness measurement systems etc...
- Auxilliary data management
- Barcode/Datamatrix readers management

### Itastat 6 Measure

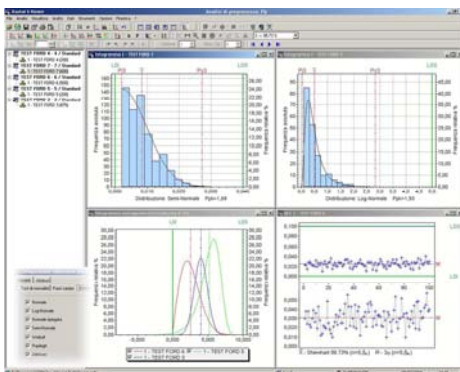

- Real time control charts
- Instrument connection (calipers, gauges, probes, multiple-dimensional measuring equipment) and 100% post-process control
- Configurable interface
- Drawing / document management

### Itageo 6 Itasonic special gauges

- Multiple-dimensional roundness measurement systems for brake disc, shaft and electric motor inspection
- Structural controls of nodular cast iron
- Eigen Frequencies measuring

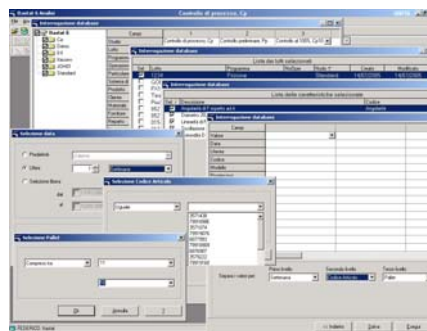

### Itastat 6 Analysis

- SPC Analysis (Cm, Cp, 100%)
- Measurement Systems Analysis
- Customizable reports
- Fully compliant to Ford tests
- Possibility to save statistical evaluation

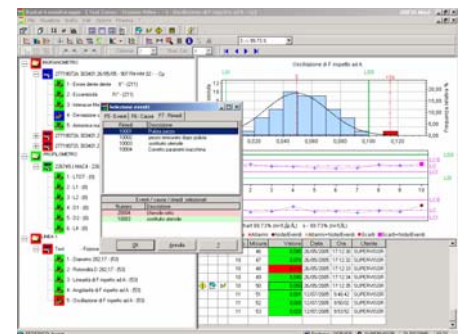

Itastat 6 DB

### Itaselect

- Selection Wizard
- Storable queries
- Data stratification for reports (Cp by machine and by week / month)

### Italarm

- Real-time monitoring of critical characteristics
- Client-server architecture
- Remote alarm management
