INTEGRATED SOLUTIONS FOR MEASURING

Hammer IMAD 908

The automatic hammers of the series Imad 909 are entirely realized by TQM Itaca Technology srl..

The microphone is integrated in order to simplify the operations of retooling for type change. The impact force and important parameters are totally settable from the software Itasonic2010[©].

The automatic hammer ensures the maximum repeatability of the impact, fundamental for a correct analysis of the sonic spectrum.
